

# One-day Workshop on Hydroinformatics Products & Services by NRSC under National Hydrology Project

15th December 2023, New Delhi

National Remote Sensing Centre, ISRO organized a one-day National Workshop at New Delhi on 15 Dec, 2023 to create awareness among stakeholders of the country on Hydroinformatics Products & Services under National Hydrology Project by NRSC and to showcase the future potential Earth Observation data for water resources sector.

The Workshop was inaugurated by **Smt. Debashree Mukherjee**, Secretary, Department of Water Resources, River Development & Ganga Rejuvenation, Ministry of Jal Sakti, in the presence of **Dr. Prakash Chauhan**, Director, NRSC; **Shri. Anand Mohan**, Joint Secretary, (RD&PP) and **Ms. Sumila Gulyani**, Practice Manager, World Bank.

The workshop was attended by more than 100 delegates from the State Surface and Groundwater Departments, Central agencies (NCA, NWIC, Central Water Commission, NHPC, NPMU) and representatives from IIT-Madras & World Bank.

During the Inaugural Session, new version of the Bhuvan-NHP web portal (HYDROSIGHT); the Compendium on NRSC activities under NHP; 750m Evapotranspiration & long-term historic Hydrological products were released.

This workshop showcased various Hydro-informatics products and services developed under NHP by NRSC with a talk on future Indian Earth Observation missions useful for the Water sector. The role of Earth Observation Technologies during NHP Advance Phase was also deliberated.
