

EOS-6 OCEANSAT-3 **Captures Cyclone Mandous** **Date : 7 Dec 2022**

Wind Speed (m/s)

↑ 0 - 2

↑ 2 - 4

↑ 4 - 6

↑ 6 - 8

↑ 8 - 10

↑ 10 - 12

- A combined image of Ocean Colour Monitor (OCM) showing cloud structure associated with Cyclone Mandous along with wind vectors derived from OS-3 Scatterometer.
- High winds associated with cyclone centre are well captured, showing a unique combination of optical and microwave remote sensing based data from Oceansat-3 for cyclone studies.
